

Name: _____

30

Simplify the fractions, if possible.

1. $\frac{3}{12}$

2. $\frac{-20}{60}$

3. $\frac{-6}{42}$

4. $\frac{18}{27}$

Review.

5. When adding fractions, what is needed?

6. When adding two numbers with the same sign...

7. Subtracting a negative is the same as

8. Any number divided by itself is _____

Fractions - Part 2

30

Remember: "Leave, Change, Flip"

Hint: Simplify FIRST, then multiply!

$$9. \frac{3}{4} \cdot \frac{2}{7}$$

$$10. \frac{-2}{21} \div \frac{-5}{7}$$

$$11. \frac{-1}{6} \div \frac{17}{30}$$

$$12. \frac{1}{4} \div \frac{5}{-6}$$
