

Name:

When trying to find 10%, simply move the decimal once (to the left, to make the price smaller).

To find 1%: Move the decimal twice.

To find 5%: First find 10%, then cut that amount in half.

To find 11%: First find 10%. Then find 1%. Lastly, add 10% and 1% together to get 11%.

1. What is 10% of 20.34?

2. What is 1% of 76.28?

3. What is 1% of 19.84?

4. What is 5% of 19.84?

5. What is 6% of 19.84?

6. What is 15% of 56.91?

Percents (moving the decimal)

Word Problems.

7. You go food shopping and the total price of your groceries is \$89.37. Sale tax is 10%. How much will you pay in sales tax?
8. You hired movers to move all the furniture in your house. They charge you \$176.23. What is 20% of the bill?
